DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Saito et al (US 6,651,491 B2).

Regarding claim 1, the reference of Saito et al discloses a failure diagnostic system of evaporated fuel processing system including the following subject matters: a first failure

Art Unit: 3747

diagnostic system and a second failure diagnostic system (see abstract), the diagnostic system comprising the steps of:

determining a fault of said pressure system having a pressure sensor with said first diagnostic system (col. 4, lines 26-56) ; and

checking at least said second diagnostic system as second fault as a consequence of said pressure system fault determined with said first diagnostic system (col. 4, lines 57-67).

Regarding claims 2-6, as discussed in above rejected claim, and the reference of Saito et al further discloses in col. 5, line 1 through col. 6, line 42).

Regarding claims 7-8, as discussed in the method of above rejected claims.

Regarding claim 9, as above discussions.

Regarding to claim 10, the reference of Saito et al further discloses the ECU (11) controls the diagnostic failure system (see figs. 3-5, and col. 6, lines 5-55).

Regarding claims 11-14, as above rejections.

Regarding claims 15-16, as discussed in claims 1-9.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The copies of U.S Patent are provided.

Roelle et al (US 2004/0074453 A1), Fujino et al (US 6,691,023 B2), and Nagashima et al (US 6,754,611 B2).
